

Notes Migrator for Exchange

ZeroIMPACT migration from Lotus Notes to Microsoft Exchange and Exchange Online

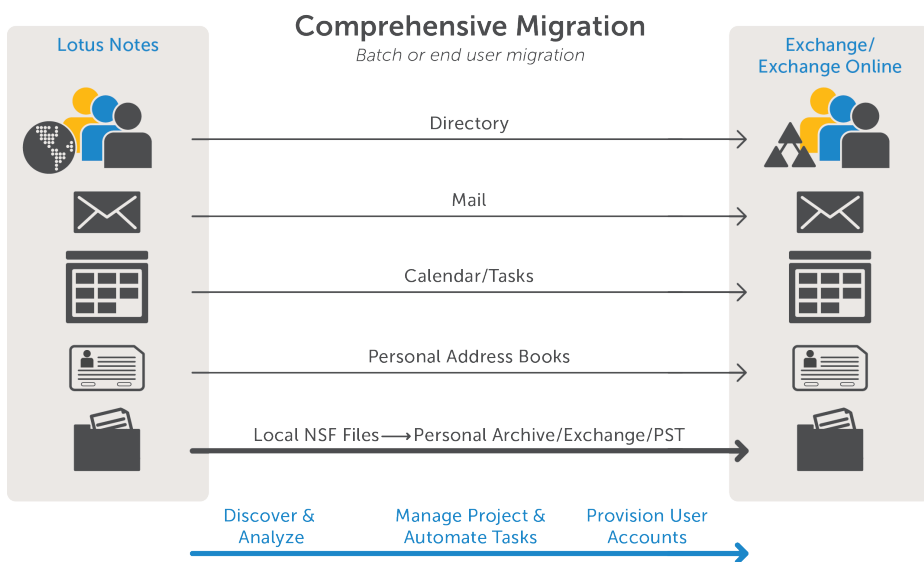

Notes-to-Exchange migrations can be complex and expensive projects that introduce tremendous risks: downtime and data loss can disrupt end-user productivity and business operations. Ensuring a seamless transition without hurting productivity or introducing undue IT burden is critical for an on-time, on-budget and risk-free migration.

Notes Migrator for Exchange from Dell® mitigates these risks and reduces the burden on the migration team and

help desk by providing a ZeroIMPACT migration from Notes to Exchange Server 2007/2010/2013, Office 365 and hosted Exchange platforms. You'll stay in command of your project with an intuitive project management interface, and your email and calendar data will be accurately migrated with minimal resources and disruption. With Notes Migrator for Exchange, you can complete your project on time and on budget.

"We felt extremely confident using Coexistence Manager for Notes and Notes Migrator for Exchange, and managed to finish our migration two months ahead of schedule. By using these products, we migrated email with 100 percent accuracy, and our users were able to collaborate and schedule meetings with each other, no matter which platform their mailbox resided on."

Mary Morabito, project manager for technical services, Coca-Cola Bottling Co. Consolidated

Benefits:

- Migrates without downtime or data loss, maintaining business productivity
- Ensures the migration is seamless to end users, thereby avoiding an increase in help desk calls
- Simplifies the migration process, enabling its completion on schedule
- Enables IT to centrally manage the migration and keep management informed of progress
- Lowers support and maintenance costs by eliminating or reducing Notes infrastructure faster than you thought possible
- Is backed by an experienced vendor with a track record of successful migrations and 24/7 global support

System requirements

Domino server(s)

Lotus Domino version 5.x, 6.x, 7.0.0-7.0.4, 8.0.0-8.0.2, 8.5.0-8.5.3

Exchange server(s)

Exchange 2013, Exchange 2010 (SP0, SP1, SP2 or SP3), Exchange 2007 (SP0, SP1, SP2 or SP3), Office 365, Live@Edu or BPOS-S

Notes end user workstations

32-bit or 64-bit version of Windows 7, Windows Vista (Business, Enterprise or Ultimate), Windows 2003, or 32-bit (only) version of Windows XP SP2 or SP3

Lotus Notes client version 5.0.11 to 7.0.4 (inclusive), 8.0.0-8.0.2 (inclusive) or 8.5.0-8.5.3 (inclusive)

32-bit edition (only) of Outlook 2010, 2007 or 2003

Note: This list shows only the most basic requirements. For a complete list of system requirements, visit quest.com/notes-migrator-for-exchange

Features

Finish fast

A multi-threaded migration engine enables the transition of multiple mailboxes simultaneously, reducing project costs and timelines. You can also install multiple migration consoles to further increase scalability.

Complete control

You can monitor your project status from a central console and gather migration results to generate reports that satisfy management requirements.

Anytime scheduling

Notes Migrator for Exchange automates administrative tasks, such as mailbox creation and mail routing, to reduce IT work time. You can also schedule migration jobs to run when they least impact network bandwidth, such as at night or during the weekend.

Self-service desktop migrator

End users or administrators can silently migrate personal data without data loss, including archives and encrypted messages, to Exchange, personal archives or Outlook personal stores. You can also avoid network bottlenecks by staggering scheduled migrations and limiting the number of users migrating.

Quick cloud

With Notes Migrator for Exchange, you can migrate Notes mailbox content directly to Microsoft Office and other hosted Exchange platforms, instead of using a two-step migration process or an intermediary data center. This mitigates the risk of data loss and ensures a quick and secure migration.

Know, then go

Perform a pre-migration assessment of your Notes and Domino environment to plan for your project and mitigate risk. MessageStats Report Pack for Lotus Notes from Dell Software is integrated with Notes Migrator for Exchange to easily identify unused mailboxes, encrypted content, shared folders, active mail and other critical data so you can plan a faster and less expensive migration. You can also plan for future storage capacity with MessageStats' storage assessment reports.
